## ESTABLISHMENT

- Germination: 7–10 days
- First mowing: Approximately 21 days, depending on usage
- Full coverage: 30 days  
First limited use: 60–90 days

Selection 1 doob is a versatile Cynodon Dactylon grass seed. It sits well for India given its diverse landscape. It is a very good choice for turf managers who need a seeded doob grass no matter what growing zone they are in India.

It's coated to enhance the establishment. It performs well in a variety of situations at both 0.5 inch and 1.5 inch mowing heights. It gives excellent winter survival and cold tolerance. Selection 1 doob will give high output for turf grass quality, colour, density and texture.
